

# PETROBASE WEBSITE REVIEW WITH MR. GODSWILL, Ms ADUKEH AND MR. SOLOMON

14<sup>th</sup> May 2024

- The key point is to make the site simpler and make the site, just one... not different country sites on one website, one website encompassing all the branches of Petrobase

## HOME PAGE

Add **GUYANA** to the branch Countries

Change *Integrated Energy Service Company* to *Integrated Service Group*

Contact Information

- Remove the third phone number in the United States
- Change Namibian email to [info-namibia@petrobasegroup.com](mailto:info-namibia@petrobasegroup.com)
- Guyana's contact email should be [info-guyana@petrobasegroup.com](mailto:info-guyana@petrobasegroup.com)
- Use the Last phone number in the United States as the contact information for Guyana

## ABOUT US

Change Pictures

Remove the following Pages

1. Silvering RMS2
2. Hand scan
3. Tubular Inspection

*The About Us should not be per country, it should be collapsed into one*

*They want these on the website*

**Mission**

**Vision**

## ***Our Core Values***

### **Change What We Do to World Wide Services**

- The previous format used here has been changed to meet the current transformation in history, a new format and how it will be listed will be sent

## **PROJECTS**

The project page as it is should be overhauled, it should be well-detailed with job title and Clients worked for. (with pictures)

They are adding a new division called the Gas division, which will be reflected on the website

They want a situation where staff can log into Invex on the website.

Petrobase will provide us with relevant information needed for the website before 24<sup>th</sup> May 2024

*They are saying that some time ago their Inventory was uploaded and saved on their server. They would like to have that information*
